

1839. Longest Substring Of All Vowels in Order

Solved ●

Medium Topics Hint

A string is considered **beautiful** if it satisfies the following conditions:

- Each of the 5 English vowels ('a', 'e', 'i', 'o', 'u') must appear **at least once** in it.
- The letters must be sorted in **alphabetical order** (i.e. all 'a's before 'e's, all 'e's before 'i's, etc.).

For example, strings "aeiou" and "aaaaaeiiiioou" are considered **beautiful**, but "uaeio", "aeiou", and "aaaaeeooo" are **not beautiful**.

Given a string word consisting of English vowels, return *the length of the longest beautiful substring of word*. If no such substring exists, return 0.

A **substring** is a contiguous sequence of characters in a string.

Example 1:

Input: word = "aeiaaioaaaaaeiiiiouuuooaauuaeiu"
Output: 13
Explanation: The longest beautiful substring in word is "aaaaaeiiiouuu" of length 13.

Example 2:

Input: word = "aeeeeiiiiooauuuaeiou"
Output: 5
Explanation: The longest beautiful substring in word is "aeiou" of length 5.

Example 3:

Input: word = "a"
Output: 0
Explanation: There is no beautiful substring, so return 0.

Constraints:

- 1 <= word.length <= 5 * 10⁵
- word consists of characters 'a', 'e', 'i', 'o', and 'u'.
